

Clinical Services

We recently hired two new CMA staff members. We have a total of 10 CMAs

CMA: A certified medical assistant completes a minimum one-year training program and must pass a national accreditation exam.

Lab/X-Ray

In order to maintain our quick turnaround times, preventative maintenance on our equipment is done during student breaks.

- Serviced over
- Digital radiology equipment
- winter break:
- Vitros Chemistry equipment
- Cell-Dyn CBC equipment

Physical Therapy

Most students that require orthopedic surgery do so over break. This causes an influx of students beginning their rehabilitation at ISU Physical Therapy at the beginning of the spring semester.

Pharmacy

In 2013, the Pharmacy filled more prescriptions than ever before!

40,164

Communications

We worked with **ISU News Service** to produce a video on flu vaccinations.

Prevention Services

Prevention Services and ISU Department of Residence staff began a partnership to develop consistent communication messages revolving around high-risk drinking and sexual misconduct.

Administration

The clinic completed a major upgrade to our electronic medical records system that will increase functionality and allow us to be compliant with the federal government's new medical billing requirements.

Condom Distribution

Proven to Make a #SaferState

Research from the Center for Disease Control shows that condom distribution is an effective form of reducing sexually transmitted disease on college campuses.

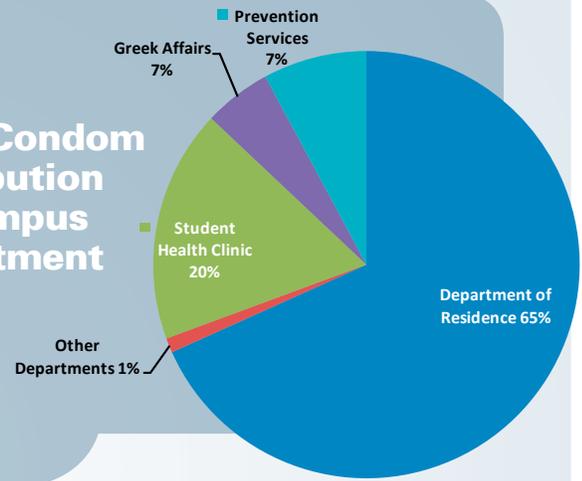

During the fall 2013 semester, Student Health's Prevention Services department distributed approximately **54,445 free condoms** on campus as a way to make Iowa State a safer place for our students. The total supply cost was \$4,024.

Online Condom Request Form for Groups

New in 2013, Prevention Services created an online condom request form for groups to use when requesting large quantities of condoms. Through the use of the new form and also the prior methods of ordering, Prevention Services responded to 64 requests for condoms in the fall. These requests came after the initial August Department of Residence resource fair distribution.

The condom request form is only for requesting standard, lubricated latex condoms. If groups would like to request other safer sex supplies from Prevention Services (i.e. dental dams, non-latex condoms, flavored condoms, water-based lubricant) they can email the office directly to arrange pick-up.

Total Condom Distribution by Campus Department

Individual Condom Distribution on Campus

Individuals can also pick up free condoms provided by Prevention Services. This fall, 4000 condoms were distributed on campus during Free Condom Wednesdays and Thursdays.

- **Free Condom Wednesdays from 10am-2pm at UDCC**
- **Free Condom Thursdays from 10am-2pm at the MU**

Condoms are also available in the clinic and in the Prevention Services department during business hours. Student can get up to 10 free condoms per visit. Over 11,000 condoms were given out this fall through these routes.
